Module 2 – Assignment 2

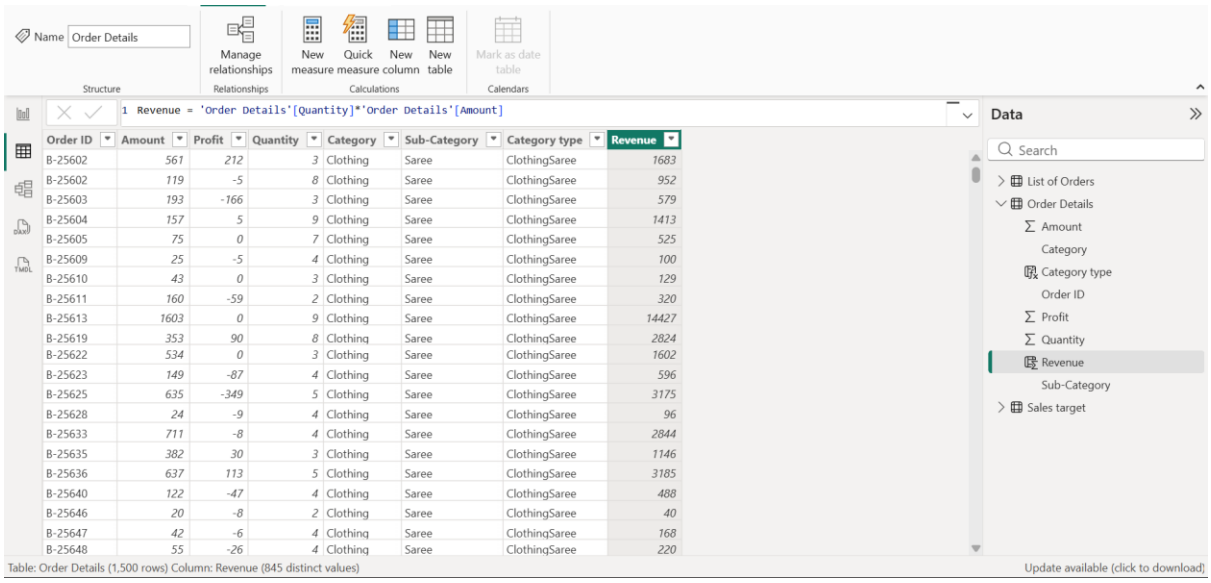

DAX Calculations

Calculated Columns

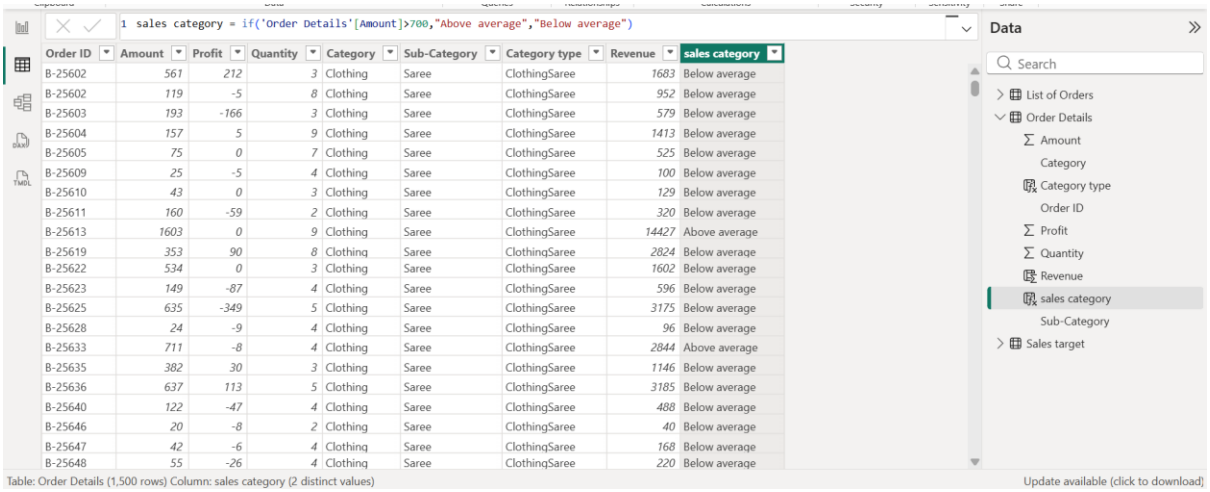

● **Create a Calculated Column for 'Category Type':** Add a calculated column in the Order Details table that combines the 'Category' and 'Sub-Category' columns into a single 'Category Type' column.

● **Calculate Revenue per Order in Order Details Table:** Create a calculated column in the Order Details table to compute the revenue (Amount * Quantity) per order.

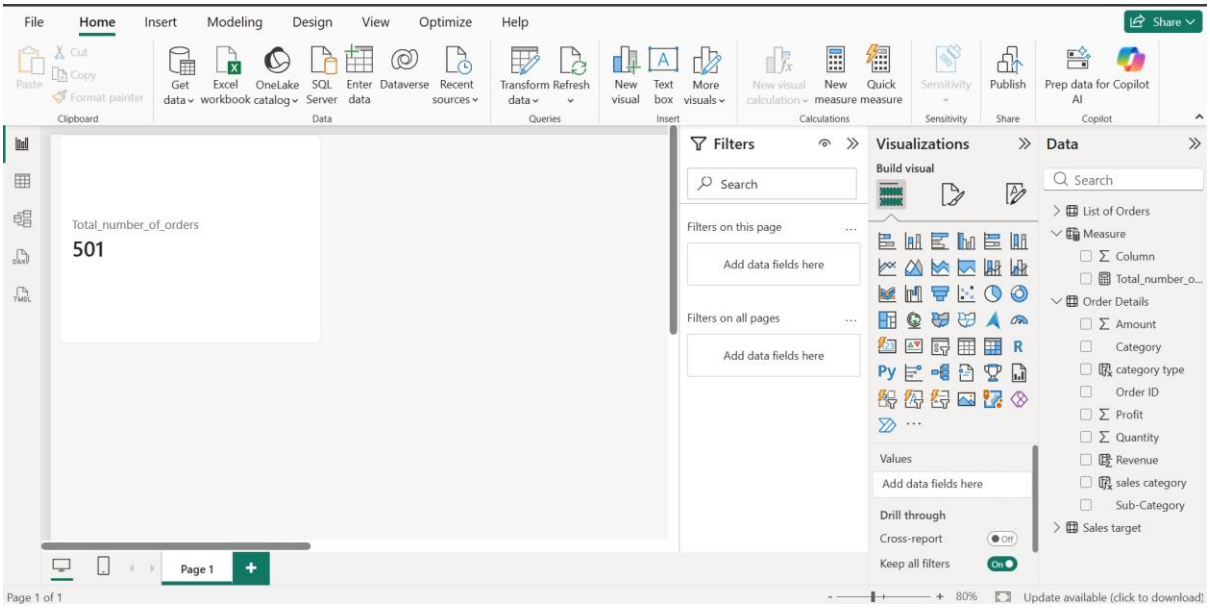

● **Create a Calculated Column to Categorize Sales:** Add a calculated column named ‘Sales Category’ in the Order Details table that categorizes each order as 'Above Average' or 'Below Average' based on the Amount value.

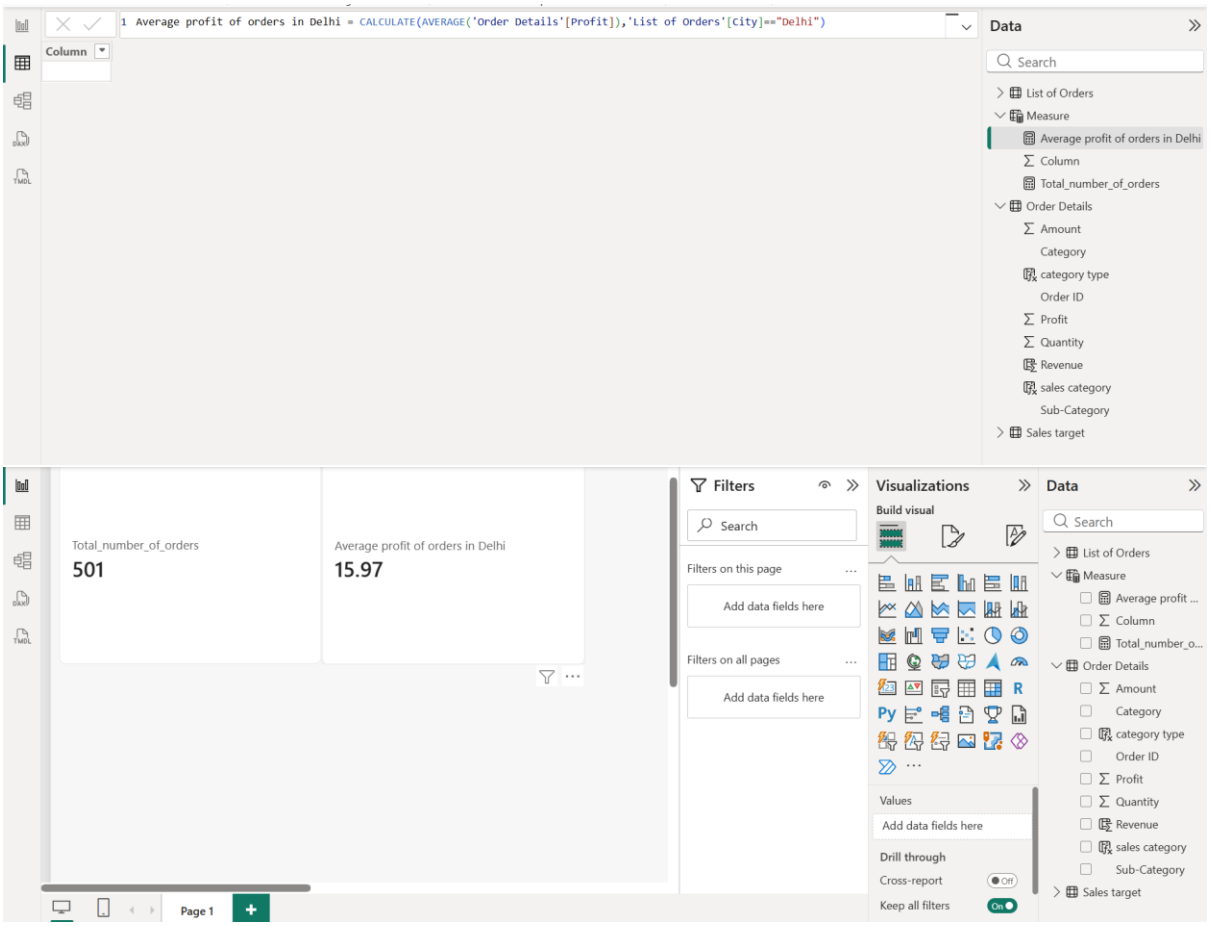

Calculated Measures

1. Order Count- Create a measure that calculates the total number of orders in the Order Details table.

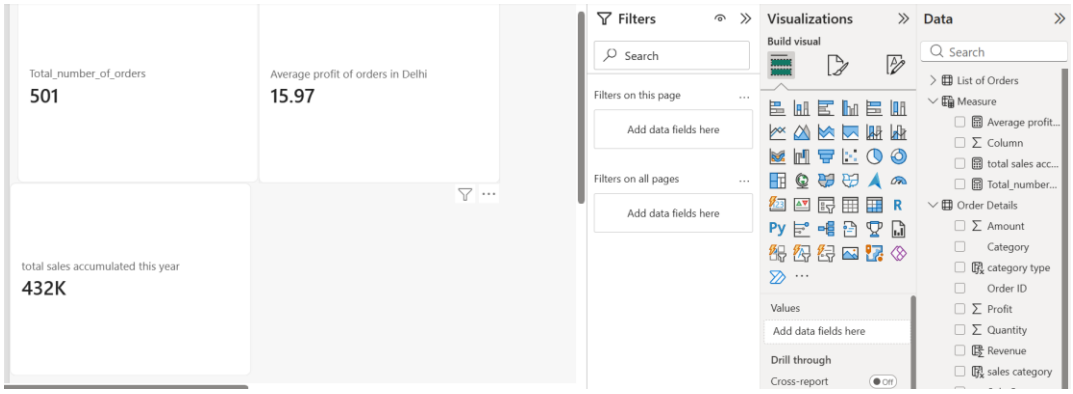

2. Average Profit in Delhi- Create a measure that calculates the average profit for orders placed in Delhi.

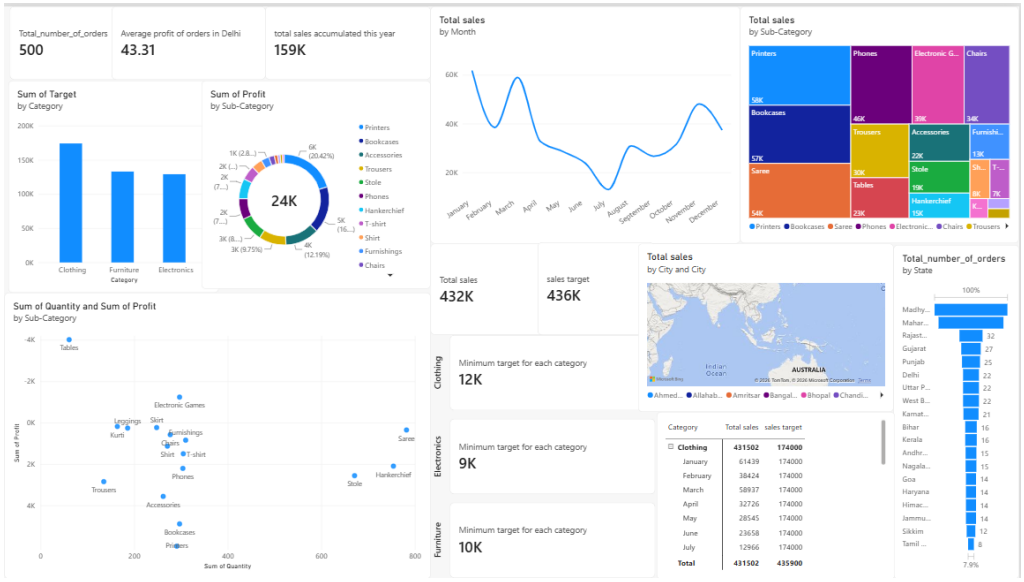

3. Year-to-Date (YTD) Sales- Create a measure that calculates total sales accumulated from the beginning of the year up to the current order date.

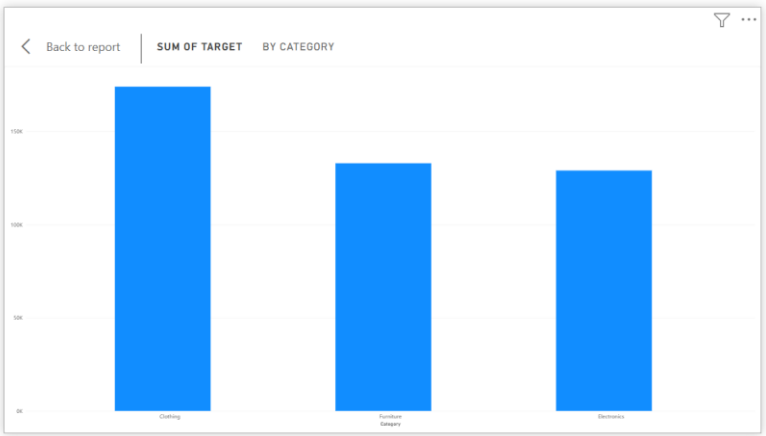

Data Visualization

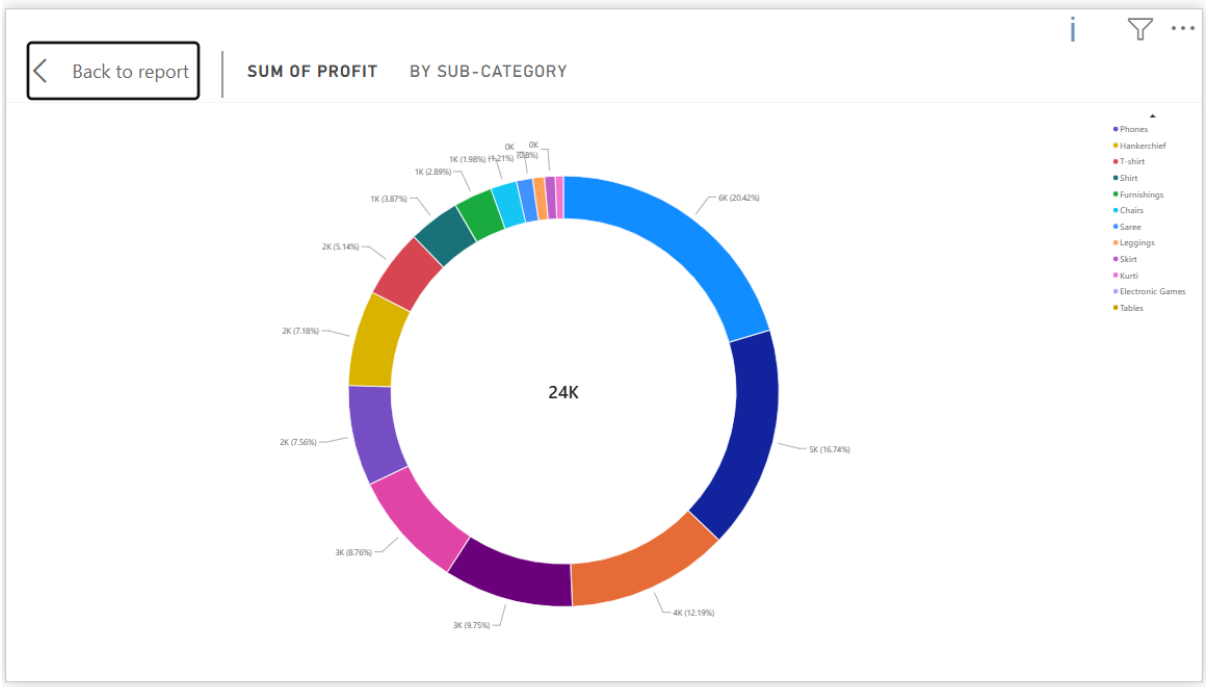

Create the following visualizations using Power BI:

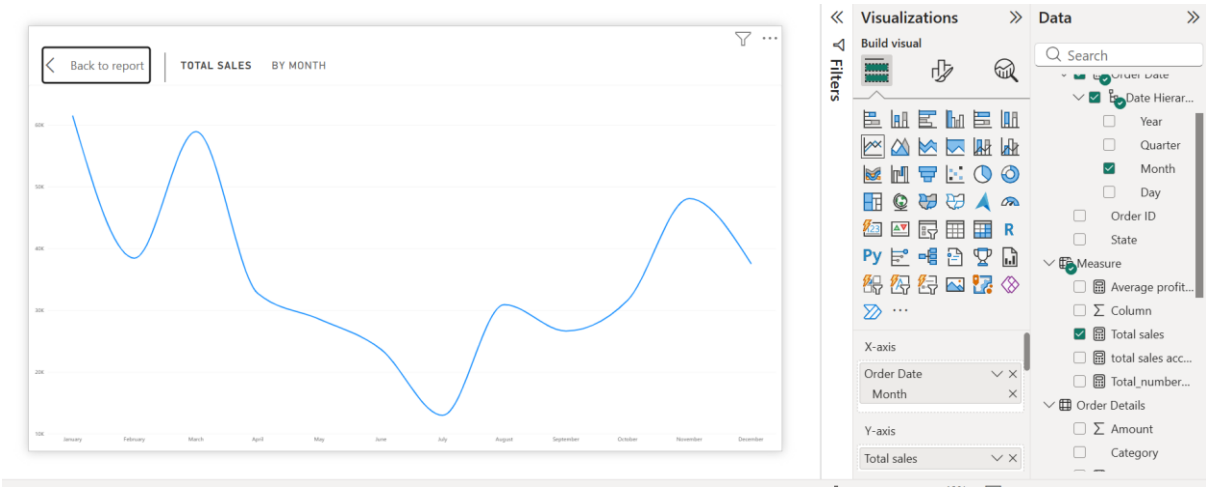

● **Sales Target Achievement by Category**: Compare actual sales with sales targets by category using a clustered column chart.

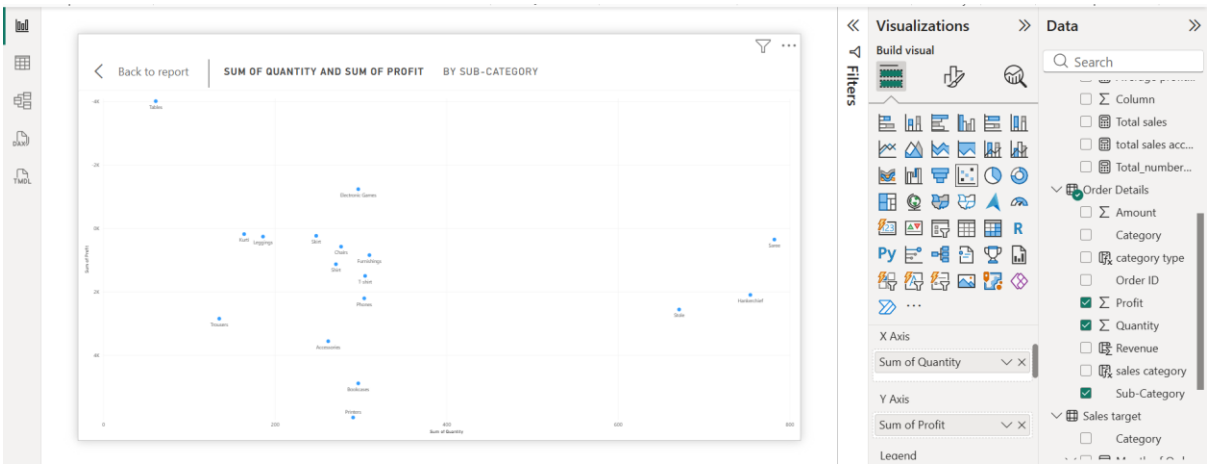

● **Max Profit Margin by Sub-Category:** Analyze the maximum profit margin for each sub-category of products using a donut chart.

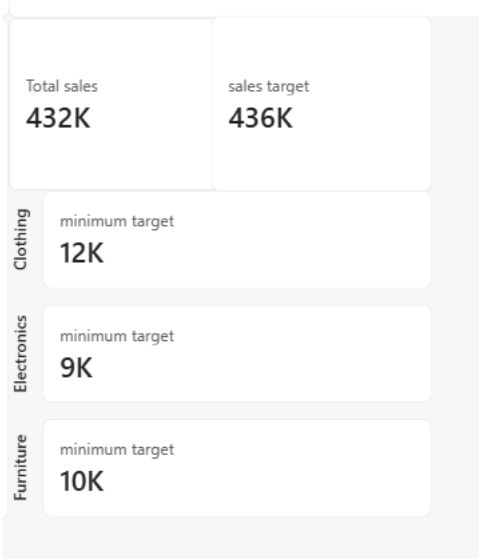

● **Monthly Sales Trend:** Show the trend of monthly sales over time using a line chart.

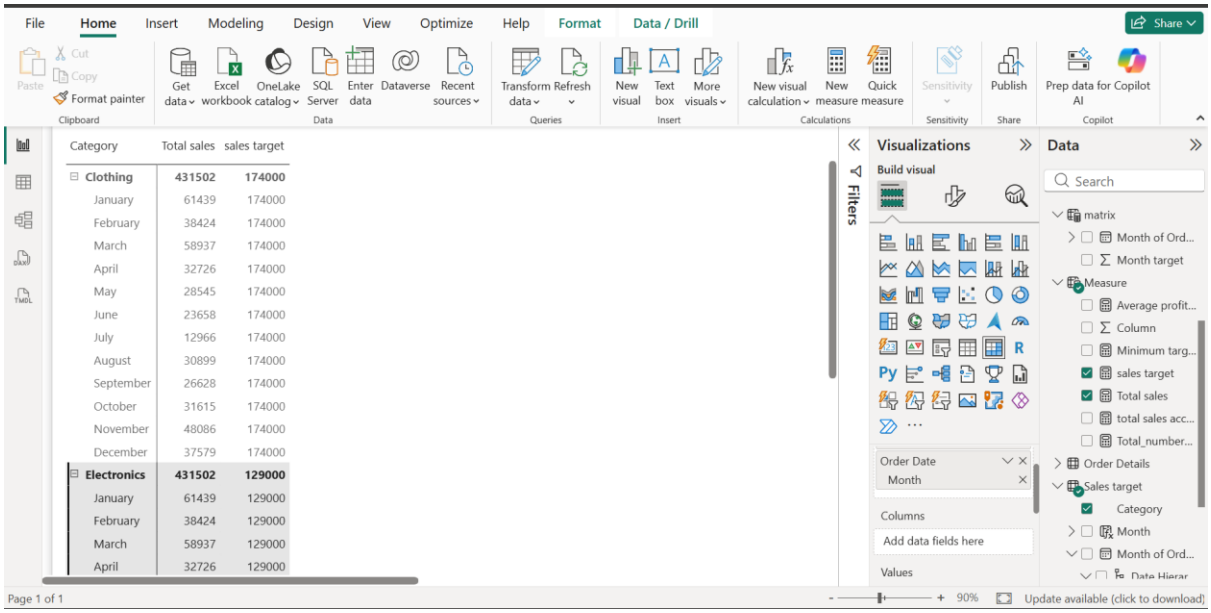

● **Comparison of Profit and Quantity by Sub-Category:** Compare the relationship between profit and quantity sold for different sub-categories using a scatter chart.

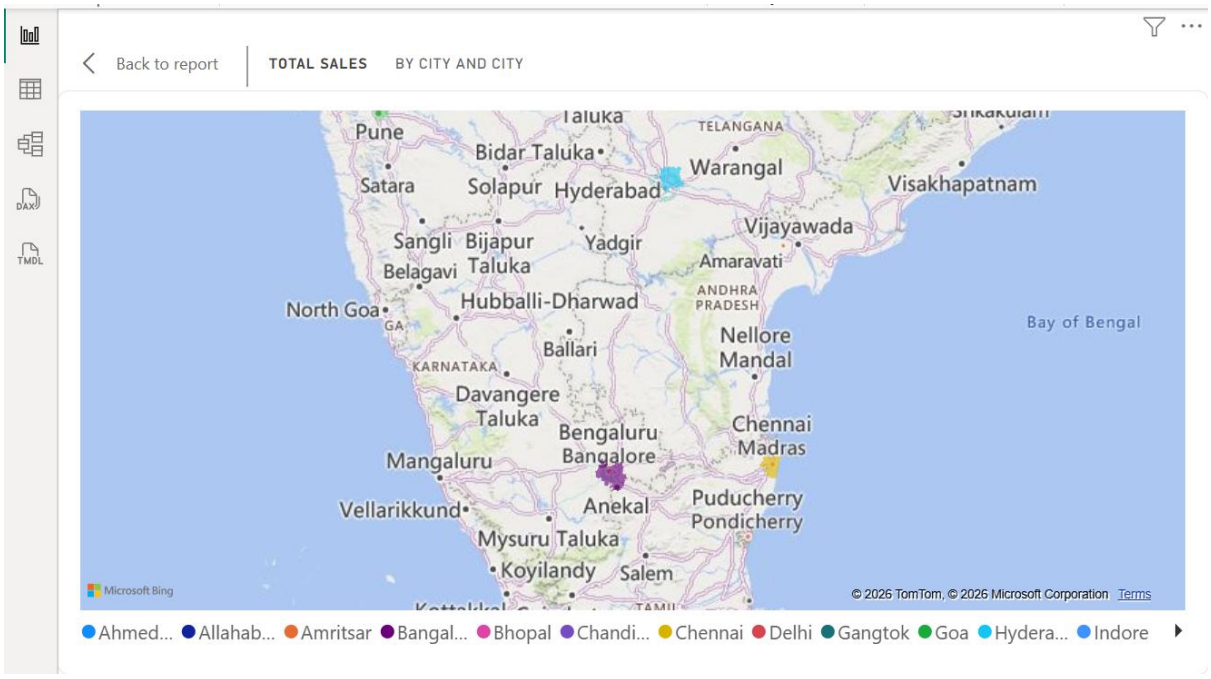

● **Comparison of Total Sales Amount and Target:** Create cards to succinctly display the total sales amount alongside the sales target for quick comparison and analysis. Also, create a multi-row card to display the minimum target for each segment.

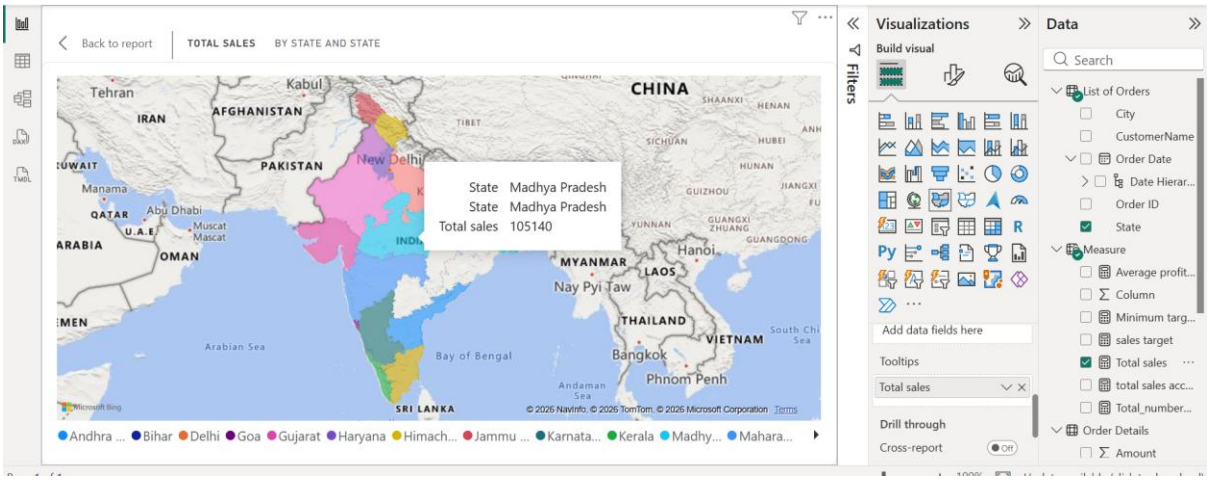

● **Sales Performance Matrix:** Build a matrix view to analyze how actual sales compare to sales targets across different categories and months.

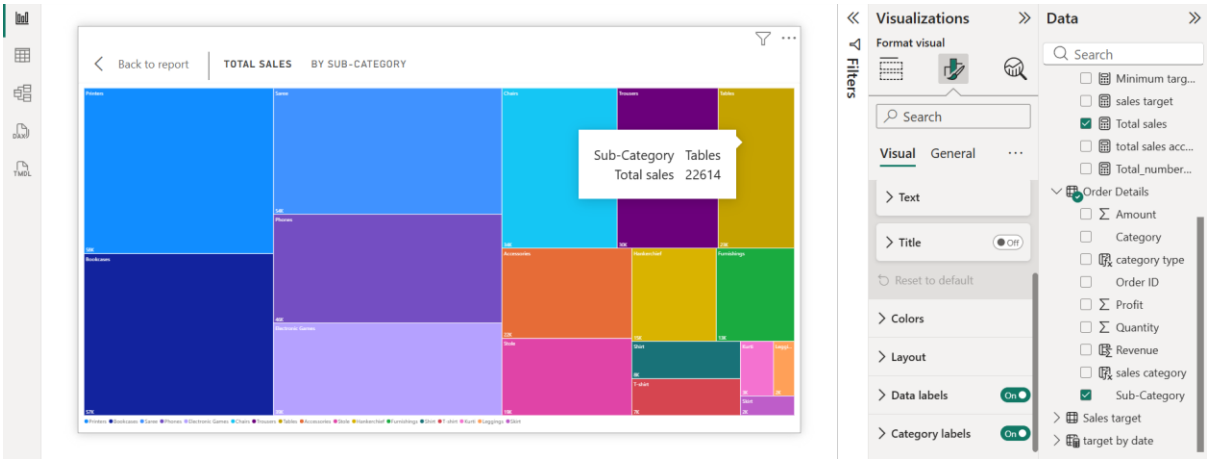

● **Geographic Sales Analysis:** Visualize total sales on a map by city to identify regional sales patterns.

● **Sales Distribution by Sub-Category:** Represent the sales distribution across different sub-categories using a treemap.

● **Order Count Analysis by State:** Create a funnel chart to visualize the distribution of order counts across different states.
